Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Mashberg (US 4,321,251).

Mashberg teaches that toluidine blue is useful as a biological stain for abnormal tissue which reads on the instant claims when X is methyl on N, X is H on phenyl and Y is NHR where R is methyl.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mashberg (US 4,321,251).

Mashberg have been discussed *supra*. The other compounds which are methyl or hydrogen derivatives of toluidine blue are considered to be obvious variants to the ordinary skilled artisan. Hydrogen for methyl or methyl for hydrogen is a common substitution in the chemical arts for a given class of structurally similar compounds wherein one would expect the resultant compounds upon said substitution, to possess

the same or similar activity as their known counterparts, in this case, as a useful biological stain for abnormal tissue, absent some unobvious or unexpected results.

No unobvious or unexpected results are seen.

Allowable Subject Matter

Claims drawn to the compounds and methods wherein R is aminomethylbenzene is allowable over the prior art of record.

Claims 5-7 are objected to as being dependent on a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
